

QUESTAR® PROFILE

A ROCKIES-BASED INTEGRATED NATURAL GAS COMPANY

Questar Corporation is a natural gas-focused energy company with core operations in the Rockies. We produce, transport, store and distribute clean, abundant and affordable American natural gas.

VALUE PROPOSITION

Questar is a Rockies-based integrated natural gas company offering growth and high returns. Wexpro provides the potential for higher returns than regulated operations. Questar's regulated businesses — retail gas distribution and interstate natural gas transportation and storage — provide earnings that are less sensitive to commodity prices, support our strong credit ratings and pay a competitive dividend.

QUESTAR'S THREE PRINCIPAL BUSINESSES

Retail Gas Distribution

Questar Gas provides retail natural gas-distribution service to about 910,000 customers in Utah, southwestern Wyoming and southeastern Idaho. Questar Gas is regulated by public service commissions in Utah and Wyoming.

Interstate Gas Transportation & Storage

Questar Pipeline transports and stores natural gas. Questar's pipelines interconnect with major pipelines in Utah, Wyoming, Colorado, New Mexico, Arizona and California. Questar Pipeline's system is strategically located to serve major gas-producing basins in Utah, Wyoming, western Colorado and New Mexico. Questar Pipeline owns and operates the Clay Basin storage facility, the largest underground storage reservoir in the Rocky Mountain region.

Gas & Oil Exploration and Production

Questar's gas development and production business is conducted by Wexpro. Wexpro develops and produces gas and oil for affiliate Questar Gas under the terms of a long-standing agreement with the states of Utah and Wyoming.
